OSMIA est éditée par l'Observatoire des Abeilles (OA), une association loi 1901 d'apiculteurs (ou mellitologues) d'Europe francophone qui œuvrent pour la connaissance et la protection des Abeilles sauvages.

Les articles sont :

- publiés uniquement en ligne,
- disponibles en (diamond) open access, la revue étant gratuite aussi bien pour les auteurs (pas de frais) que pour les lecteurs
- indexés / archivés par Crossref, Zoobank, HAL, Zenodo, OpenAIRE, Google Scholar et Web of Science (Clarivate) [Zoological Record],
- respectueux des recommandations de la Commission internationale de Nomenclature zoologique (CINZ),
- sous Licence Creative Commons Attribution International CC BY 4.0 qui autorise la reproduction et la diffusion du document, à condition d'en citer explicitement la source,
- librement déposables sur des sites internet ou des plateformes d'archivage.

(!) Les documents d'autres sources et non distribués sous licence libre sont reproduits après autorisation (à demander par les auteurs) et demeurent la propriété des auteurs ou éditeurs originaux.

(!) Le contenu publié est sous l'entière responsabilité des auteurs.

OSMIA est conçue pour une impression recto-verso en haute résolution. Les bibliothèques publiques, les laboratoires, les muséums et les associations sont invités à imprimer et conserver une version papier de la revue.

OSMIA is published by the Observatory of Bees (OA), a non-profit society of apidologists (or mellitologists) from French-speaking Europe who work together for the knowledge and protection of wild bees.

The items are:

- published only online,
- available in (diamond) open access, the journal being free for both authors (no fees) and readers,
- indexed / archived by Crossref, Zoobank, HAL, Zenodo, OpenAIRE, Google Scholar and Web of Science (Clarivate) [Zoological Record],
- respectful of the recommendations of the International Commission for Zoological Nomenclature (ICZN),
- under Creative Commons Attribution Licence International CC BY 4.0 which authorises the reproduction and distribution of the document, provided the source is explicitly cited,
- freely depositable on personal or institutional websites and archiving platforms.

(!) Documents from other sources and not distributed under a free license are reproduced after authorisation (to be requested by the authors) and remain the property of the original authors or publishers.

(!) The published content is the sole responsibility of the authors.

OSMIA is designed for high-resolution printing on both sides. Public libraries, laboratories, museums, and societies are invited to print and keep a paper version of the journal.
